

LACOUNTYHELPS.ORG - A WEBSITE TO HELP YOUR CLIENTS FIND INFORMATION ABOUT HEALTH AND HUMAN SERVICES PROGRAMS

The **LACountyHelps.org** website provides important information about publically administered health and human services programs that are available to individuals and families in Los Angeles County. The **LACountyHelps.org** website features a brief anonymous questionnaire that allows the user to enter their economic and demographic information and receive a list of services and programs that may be of benefit to them.

LACountyHelps.org contains program descriptions, information about office locations, office hours and contact information, along with what documentation is needed to apply. There are on-line applications for Cal-Fresh, (formerly Food Stamps), Medi-Cal, Cal-WORKs, and a variety of other programs. **LACountyHelps.org** is now available in nine languages – English, Armenian, Cambodian, Chinese, Korean, Russian, Spanish, Tagalog, and Vietnamese.

LACountyHelps.org is equally useful for service professionals or members of the public as a tool to identify an individual's potential eligibility for specific services. Please review the **LACountyHelps** Introductory Brochure at: http://lacountyhelps.org/download/LACH_ENG_200811.pdf

You may also view an introductory video available at the home page of the **LACountyHelps.org** website.

The anonymous questionnaire will most often be completed by the client themselves, but a mental health professional may assist the client in completing the questionnaire, or it may be completed by a mental health professional to obtain a list of appropriate services to share with their client.

We suggest you visit <http://www.LACountyHelps.org> to learn more about how the website may help you when recommending useful programs for your clients. You can request additional brochures, currently only available in English or Spanish, through the "Contact Us" link on the website.
